

Thermal Temperature Monitoring for Gaming

Highlights:

Casinos have multiple points of entry, from casino floor entrances and hotel areas to parking lots. The temperature monitoring solution provides a seamless, time-efficient way to assess potential high temperatures of large groups of people without disrupting the normal flow of operations.

Key Benefits:

Thanks to these features, users can set up effective temperature monitoring stations that can be strategically placed in multiple areas with high foot traffic. This makes it easy to identify potential risks and manage the situation proactively.

High efficiency

Built-in AI algorithm allows monitoring of up to 30 people simultaneously

Flexible

Can be used in any environment where a large group of people congregate or pass through

Contact-free

Measure temperature from up to 15 feet away and reduce risk of transmission

Search and Storage

Easily store and search alarm data

Customizable

Set a threshold for temperature assessments and receive alerts automatically

Interoperability with 3rd Party Solutions

Dahua thermal alarm functions are currently supported with third-party technology partners including Axon, Genetec, Milestone, and Qognify,* with more integrations coming in the future. Thermal temperature monitoring supports ONVIF Profiles S, G, and T, enabling the thermal camera to work with any ONVIF-supported partner.

*Customized firmware's are required to work with 3rd party partners.
