

Thermal Temperature Monitoring for Healthcare

Highlights:

Hospitals are on the front lines of health crises and must manage resources wisely to provide the highest quality of care to all patients in need. The temperature monitoring solution provides a seamless, time-efficient way to assess potential high temperatures of large groups of people without personal contact.

Key Benefits:

Thanks to these features, users can set up effective temperature monitoring stations that can be strategically placed in multiple areas with high foot traffic. This makes it easy to identify potential risks and manage the situation proactively.

High efficiency

Built-in AI algorithm allows monitoring of up to 30 people simultaneously

Flexible

Can be used in any environment where a large group of people congregate or pass through

Contact-free

Measure temperature from up to 15 feet away and reduce risk of transmission

Search and Storage

Easily store and search alarm data

Customizable

Set a threshold for temperature assessments and receive alerts automatically
